living and working spaces.

CEILING SLAB

TECHNICAL SHEET

CEILING SLAB

The acoustic ceiling slabs are created from a textile material made from Varian®: a hybrid and biosourced material made from flax fibre.

Manufactured in France by the company CULTURE IN, the Varian® ceiling elements are eco-designed, with no VOC emissions, ensuring optimal air quality. The Varian® meets the requirements of the BREEAM and LEED standards.

Varian® acoustic solutions are available without fire treatment for the smallest possible ecological footprint, or with fire treatment to meet fire standards.

Ideal for interior space planning, our suspended ceiling slabs have been designed to fit into work spaces. Fitting into standard ceilings, the tiles are fitted with an acoustic filter to aid sound absorption.

CEILING SLAB

TECHNICAL CHARACTERISTICS

Ceiling slab

Dimension	Size L
Width (mm)	600
Height (mm)	600
Depth (mm)	40
Weight (kg)	0,7
Reference	1DALP001
