TECHNICAL SHEET

# CLAUSTRAS

---

The acoustic claustras are created from a textile material made of Varian® : a hybrid and biosourced material made of flax fibre.

Manufactured in France by the company CULTURE IN, the Varian® separators are eco-designed, without VOC emissions, ensuring optimal air quality. The Varian® meets the requirements of the BREEM and LEED standards.

Varian® acoustic solutions are available without fire treatment for the smallest possible ecological footprint, or with treatment to meet fire safety standards.

Ideal for interior space planning, our claustras have been designed to separate spaces. Slipped onto a metal plate, the laths can be rotated and each one is fitted with an acoustic filter to help absorb sound while allowing light to pass through.

## TECHNICAL CHARACTERISTICS

Dimension	Size S	Size M	Size L
Width (mm)	800	800	800
Height (mm)	1200	1500	1800
Depth (mm)	300	300	300
Weight (kg)	23	26	30
Reference	1LATC001	1LATC003	1LATC002
Lattis	134 x 64 mm		
Platen	Steel platen to be screwed on		

These dimensions are given as an indication, do not hesitate to consult our design office for other dimensions. Various shaping possibilities, please consult us.
