Responsible and sustainable design of
living and working spaces.

SUSPENDED BOX

TECHNICAL SHEET

SUSPENDED BOX

The acoustic suspended boxes are created from a textile material in Varian®: a hybrid and biosourced material in flax fibre.

Manufactured in France by the company CULTURE IN, the Varian® suspensions are eco-designed, without VOC emissions, ensuring optimal air quality. The Varian® meets the requirements of the BREEAM and LEED standards.

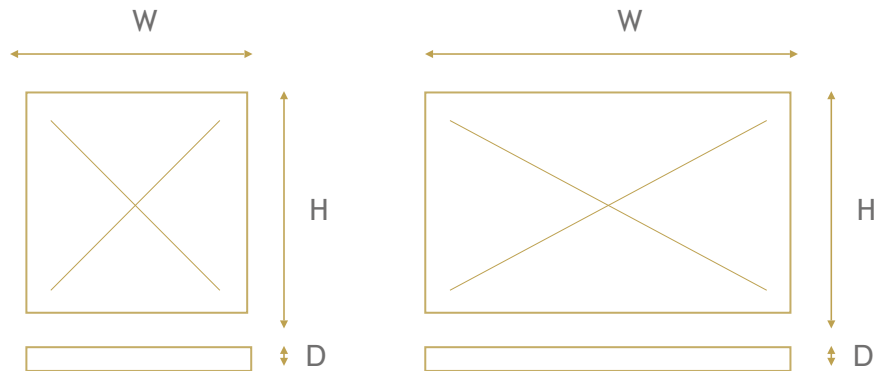

Varian® acoustic solutions are available without fire treatment for the smallest possible ecological footprint, or with fire treatment to meet fire standards.

Ideal for interior design, our suspended elements are designed to cover living and working spaces. Assembled with a metal wire, fixed to the ceiling, the suspended boxes are fitted with an acoustic filter to help absorb sound and dress up spaces.

SUSPENDED BOX
